Contents of Volume 101

Number 1, 7 March 1983

GALLANT, J., The Complexity of the Overlap Method for Sequencing Biopolymers 1

BOMZE, I. M., SCHUSTER, P. and SIGMUND, K., The Role of Mendelian Genetics in Strategic Models on Animal Behaviour . 19

IZQUIERDO, J. M. and PEREZ, C., A Stochastic Approach for the Interpretation of Single Pulse Experiments in Morphological Multicompartments of Renewing and Exponentially Growing Cell Populations 39

BALASUBRAMANIAN, R. and SEETHARAMULU, P., A Conformational Rationale for the Wobble Behaviour of the First Base of the Anticodon Triplet in tRNA 77

DVOŘÁK, I., DAINTY, J. and JANÁČEK, K., Analysis of Time Hierarchy in Plant Cell Volume Changes 87

ASMUSSEN, M. A., Density Dependent Selection Incorporating Intraspecific Competition 1. A Haploid Model . . . 113

THOR, G., Some Topological Considerations of the Optic Pathway . 129

ROSE, M. R., The Contagion Mechanism for the Origin of Sex . 137

LAWS, E. A., Plots of Turnover Times Versus Added Substrate Concentrations Provide Only Upper Bounds to *in situ* Substrate Concentrations 147

Number 2, 21 March 1983

ROWE, G. W. and TRAINOR, L. E. H., On the Informational Content of Viral DNA 151

ROWE, G. W. and TRAINOR, L. E. H., A Thermodynamic Theory of Codon Bias in Viral Genes 171

FRIEDHOFF, L. T., The Effect of Ion Channels on Cell Membrane Motion 205

WAKE, D. B., ROTH, G. and WAKE, M. H., On the Problem of Stasis in Organismal Evolution 211

KOTHEKAR, V. and KAILASH, S., Biophysical Studies on Molecular Mechanisms of Abortificient Action of Prostaglandins V. CNDO/2 Estimation of the Relative Affinities of the Cations Na^+, Mg^{2+} and Ca^{2+} to the Carboxylic Group 225

KOTHEKAR, V., Biophysical Studies on Molecular Mechanism of Abortificient Action of Prostaglands VI. Conformation Energy Calculation on PGE_2, $PGF_{2\alpha}$ and 15-(S)-methyl $PGF_{2\alpha}$. 233

PORTELLI, C., The L-cell and D-cell of Mitosis 241

HOLT, C., Swelling of Golgi Vesicles in Mammary Secretory Cells and its Relation to the Yield and Quantitative Composition of Milk 247

GATES, M. A. and HANSELL, R. I. C., On the Distinctness of Clusters 263

DAY, W. H. E., Properties of the Nearest Neighbor Interchange Metric for Trees of Small Size 275

WHITE, J. G. and BORISY, G. G., On the Mechanisms of Cytokinesis in Animal Cells 289

LETTERS TO THE EDITOR

CORNISH-BOWDEN, A., Phenetic Methods of Classification Use Information that is Disregarded by Minimum-Length Methods 317

FOX, S. W. and MATSUNO, K., Self-organization of the Protocell was a Forward Process 321

ERRATUM 325

Number 3, 7 April 1983

HOPKINS, R. C., Transitions Between B-DNA and Z-DNA: A Dilemma 327

VILSTRUP, H., KEIDING, S. and VENDSBORG, P. B., Kinetics of Galactose Uptake by Perfused Rat Livers: Applicability of a Family of Models 335

ERRATUM 661

Index to Volume 101

Abortificient action of prostaglandins, V, biophysical studies on molecular mechanisms of; CNDO/2 estimation of the relative affinities of the cations Na^+, Mg^{2+} and Ca^{2+} to the carboxylic group, 225

Abortificient action of prostaglandins, VI, biophysical studies on molecular mechanisms of; conformation energy calculation on PGE_2, $PGF_{2\alpha}$ and 15-(S)-methyl $PGF_{2\alpha}$, 233

$(Adenosine\ diphosphate\ ribose)_n$ in cellular response to irradiation, 441

ALLEN, T. F. H. and WYLETO, E. P., A hierarchical model for the complexity of plant communities, 529

Animal behaviour, the role of Mendelian genetics in strategic models on, 19

Animal cells, the mechanisms of cytokinesis in, 289

Anticodon triplet in tRNA, a conformational rationale for the wobble behaviour of the first base of, 77

Aortic pulse waves, instantaneous blood flow, impedance and elastic properties computed in man from, 345

Arms races in evolution—an ESS to the opponent-independent costs game, 619

ASMUSSEN, M. A., Density dependent selection incorporating intraspecific competition 1. A haploid model, 113

BALASUBRAMANIAN, R. and SEETHARAMULU, P., A conformation rationale for the wobble behaviour of the first base of the anticodon triplet in tRNA, 77

Basal metabolism, growth process of the human body considered in connection with (letter), 493

Behaviour, animal, the role of Mendelian genetics in strategic models on, 19

Binocular plasticity, developmental, synaptic competition in, 503

Biophysical studies on molecular mechanisms of abortificient action of prostaglandins, V: CNDO/2 estimation of the relative affinities of the cations Na^+, Mg^{2+} and Ca^{2+} to the carboxylic group, 225

Biophysical studies on molecular mechanisms of abortificient action of prostaglandins, VI: conformation energy calculation on PGE_2, $PGF_{2\alpha}$ and 15-(S)-methyl $PGF_{2\alpha}$, 233

Biopolymers, complexity of the overlap method for sequencing, 1

Blood flow, impedance and elastic properties computed in man from aortic pulse waves, 345

BOMZE, I. M., SCHUSTER, P. and SIGMUND, K., The role of Mendelian genetics in strategic models on animal behaviour, 19

BORISY, G. G. (see WHITE, J. G.), 289

BOYD, A. W., Cell cycle kinetic data can be simulated by a simple chemical kinetic model, 355

BURGER, R., On the evolution of dominance modifiers I. A non-linear analysis, 585

Ca^{2+} affinity to the carboxylic group; abortificient action of prostaglandins, 225

Ca^{2+} in cellular response to irradiation, 441

Cancer and evolution: synthesis (letter), 657
CO_2, a mathematical model of its effects on stomatal dynamics, 415
Cell cycle kinetic data can be simulated by a simple chemical kinetic model, 355
Cell membrane motion, effect of ion channels on, 205
Cell, nerve, paced, a model for the firing pattern of, 541
Cell, plant, analysis of time hierarchy in volume changes of, 87
Cell populations, renewing and exponentially growing, stochastic approach for interpretation of single pulse experiments in morphological multicompartments of, 39
Cell surface coats of single and interacting surfaces, charge distribution within; a minimum free electrostatic energy approach, 569
Cellular response to irradiation, Ca^{2+}, Mg^{2+} and $(adenosine\ diphosphate\ ribose)_n$ in, 441
Cells, animal, the mechanisms of cytokinesis in, 289
Cells, secretory, mammary, swelling of Golgi vesicles in; relation to the yield and quantitative composition of milk, 247
Charge distribution within cell surface coats of single and interacting surfaces—a minimum free electrostatic energy approach. Conclusions for electrophoretic mobility measurements, 569
Chemical kinetic model, simple, cell cycle kinetic data can be simulated by, 355
Circadian oscillators, are they structurally unstable?, 401
Classification, phenetic methods use information that is disregarded by minimum-length methods (letter), 317
Clusters, on the distinctness of, 263
CNDO/2 estimation of the relative affinities of the cations Na^+, Mg^{2+} and Ca^{2+} to the carboxylic group; abortificient action of prostaglandins, V, 233
Codon bias in viral genes, thermodynamic theory of, 171
COLDING-JØRGENSEN, M., A model for the firing pattern of a paced nerve cell, 541
Communities, competition, model, increase of stability with connectance in (letter), 649
Communities, plant, a hierarchical model for the complexity of, 529
Competition communities, model, increase of stability with connectance in (letter), 649
Competition, intraspecific, incorporated in density dependent selection; a haploid model, 113
Competition, synaptic, in developmental binocular plasticity, 503
Complexity of plant communities, a hierarchical model for, 529
Complexity of the overlap method for sequencing biopolymers, 1
Conformation energy calculation on PGE_2, $PGF_{2\alpha}$ and 15-(S)-methyl $PGF_{2\alpha}$; abortificient action of prostaglandins, 233
Conformational rationale for the wobble behaviour of the first base of the anticodon triplet in tRNA, 77
Connectance, increase of stability with, in model competition communities (letter), 649
Contagion mechanism for the origin of sex, 137
COOKE, J. R. (see UPADHYAYA, S. K.), 415
CORNISH-BOWDEN, A., Phenetic methods of classification use information that is disregarded by minimum-length methods (letter), 317

Cost of growth, influence on ectotherm metabolism, 453
Costs game, opponent-independent, an ESS to; arms races in evolution, 619
"Cross-linkage" model for tRNA interactions with mRNA and ribosome (letter), 479
Cytokinesis mechanisms in animal cells, 289

DAINTY, J. (see DVOŘÁK, I.), 87
DAY, W. H. E., Properties of the nearest neighbor interchange metric for trees of small size, 275
D-cell and L-cell of mitosis, 241
Density dependent selection incorporating intraspecific competition; a haploid model, 113
Developmental binocular plasticity, synaptic competition in, 503
DI PRISCO, G. V. (see LARA, R.), 503
Distinctness of clusters, 263
Dixon plots in non-steady-state situations, 387
DNA, viral, the informational content of, 151
B-DNA and Z-DNA, transitions between; a dilemma, 327
Z-DNA and B-DNA, transitions between; a dilemma, 327
Dominance modifiers, on the evolution of; a nonlinear analysis, 585
DOMINEY, W. J., Sexual selection, additive genetic variance and the "phenotypic handicap" (letter), 495
DONATH, E. and VOIGT, A., Charge distribution within cell surface coats of single and interacting surfaces—a minimum free electrostatic energy approach. Conclusions for electrophoretic mobility measurements, 569
DVOŘÁK, I., DAINTY, J. and JANÁČEK, K., Analysis of time hierarchy in plant cell volume changes, 87

Eadie-Hofstee plots in non-steady-state situations, 387
Ectotherm metabolism, influence of the cost of growth on, 453
Electrophoretic mobility measurements, and the charge distribution within cell surface coats of single and interacting surfaces, 569
ESS to the opponent-independent costs game; arms races in evolution, 619
Evolution, arms races in; an ESS to the opponent-independent costs game, 619
Evolution, cancer and; synthesis (letter), 657
Evolution of dominance modifiers; a nonlinear analysis, 585
Evolution, organismal, the problem of stasis in, 211

FELDMAN, M. Y., "Cross-linkage" model for tRNA interactions with mRNA and ribosomes (letter), 479
Firing pattern of a paced nerve cell, a model for, 541
Forward process, self-organization of the protocell was a (letter), 321
FOX, S. W. and MATSUNO, K., Self-organization of the protocell was a forward process (letter), 321
Free electrostatic energy approach to charge distribution within cell surface coats of single and interacting surfaces, 569
